

DYNMED DO2-5E

PORTABLE OXYGEN CONCENTRATOR

DYNMED DO2-5E PORTABLE OXYGEN CONCENTRATOR

The device produces an average of 93% pure oxygen at a flow rate of 5 liters per minute, suitable for hospitals, clinics, home use, and nursing centers. It operates continuously 24/7, maintaining this purity, and requires only maintenance of the main machine throughout its lifetime.

KEY FEATURES:

- **Brand:** Dynmed
- **Model Name/Number:** DO2-5E
- **Flow Rate:** 5L/min
- **Weight (in kg):** 14kg
- **Product Type:** Portable
- **Dimensions:** 38cm × 26cm × 58cm
- **Max Output Pressure:** 70 kPa
- **Max Power Supply:** AC 230V
- **Frequency:** 50/60Hz
- **Input Power:** 300VA
- **Max Operating Temperature:** 40° C
- **Noise:** 40dB

The DynMed DO2-5E Portable Oxygen Concentrator efficiently meets oxygen needs, operating continuously for 24 hours. It features four safety alarm systems and delivers consistent oxygen purity of 93% ± 3%. Its durable ABS shell ensures reliability for long-term use.
