

# F5A Full Face Mask

## SIMPLE STRUCTURE, LIGHTWEIGHT WITH ANTI-ASPHYXIA VALVE

The full face mask is capable of auto-adaptation to the nose bridge. Simple structure and light weight provide you with more comfortable and effective therapy.

### Auto adaptation

The cushion's groove adapts to the nose bridge, maintaining low air leakage and limited face pressure.

### Liberty of vision

Based on the forehead frame-free design, users can easily embrace more vision.

### Anti-asphyxia valve

To ensure security, the position of the anti-asphyxia valve is adjusted to achieve more functions on a smaller elbow.

### More comfort

Due to the single-layer transitional design, the cushion touches the nose and face softly.
